

RE: Google Fiber for Communities

Nominate Petaluma... Before March 26th!

Google is planning to launch ultra-high speed fiber optic broadband networks in one or more trial locations across the country – yet to be selected. Imagine Internet speeds more than 100 times faster than what most Americans have access to today – over 1 gigabit per second. Google's test fiber-to-the-home connections will be provided at a competitive price to at least 50,000 and potentially up to 500,000 people. Google wants to see what developers and users can do with ultra high-speeds, whether it's creating new bandwidth-intensive "killer apps" and services, or other uses we can't yet imagine.

Should Petaluma be selected, it would offer residents and business unparalleled access speeds and exciting new opportunities, while increasing incentives for new tech companies to locate here.

The City of Petaluma is submitting our application, but Google also needs to hear from our community at large. By filling out a brief form at the web address below, you can nominate Petaluma for a chance at this amazing opportunity.

Your vote just could make the difference, so please nominate Petaluma today!
