

## **RESOURCES FOR BUILDING PROFESSIONALS**

Green building is becoming more and more popular, with homebuyers, homeowners, remodelers, business owners and office tenants looking for healthier, more resource efficient homes, and offices. If you are a developer, contractor, architect, engineer, specialty contractor, or real estate professional who wants to meet the growing demand for green buildings, now is the time to learn

more about green building and the many resources available to help promote green building services.

### **Build It Green Certified Green Building Professional Training**

This two-day, 16 hour training is open to all California building professionals involved in the design and construction of residential buildings, as well as professionals that support and develop the market for green building. Certification is available for the following professionals: Architects/Designers, Carpenters, Consultants, Contractors, Developers, Electricians, Engineers, Interior Designers, Landscapers, Plumbing Contractors, Public Agencies, Non-Profits, Real Estate Professionals, Specialty Trades, Solar Contractors and Suppliers.

### **Sonoma State University Green Building Certificate Program**

This Certificate Program is designed with the working professional in mind. It is a yearlong program focused on developing the understanding necessary to enable sustainable building decision making within a corporate, institutional, non-profit, municipal or individual setting. Graduates of this program will be able to work with the owners, project managers, architects, engineers, builders and subcontractors for a project to facilitate Green Building decision making, and to set out, monitor and fulfill attainable objectives. The program consists of six core curriculum sections that delve, with great depth, into a variety of relevant topics in both classroom and field trip settings. All program sections are open for enrollment to students not pursuing the full certificate program.

### **How to Achieve Success in Green Building**

This two page flyer will lay out four simple steps to start building green, along with tips for marketing your green building services in Petaluma.
